

Tests, Certificates & Patents

Do not confuse **Wellisair Disinfection Purifier** with most standard air filters or cleaners. Others mainly collect dust and particles from the air but do not kill and purify the air from microorganisms.

Wellisair is a high tech smart disinfection device that kills viruses and other microorganisms present on surfaces and in the air of your living space. **Wellisair** disinfects your surrounding surfaces and the air you breathe in a record 2-4 hours.

Wellisair is effective. It replicates Mother Nature's cleaning principles by producing and spreading abundance amounts of **OH radicals** in the air that interact with harmful substances such as Viruses, Bacteria, VOC's & others and eliminate them.

Type	Size of particles removed	Bacteria	Viruses	Allergens	Molds & Yeasts	VOC's	Cigarette Smoke	Odors	Maintenance	Coverage	Technology	Cost	Toxic	Efficiency
HEPA Filters	0.3 microns	Some	No	Yes	Yes	No	No	No	Yes	Medium	Passive	High	No	Low
Carbon Filters	N/A	Some	No	Some	Some	Yes	Yes	Yes	Yes	Small	Passive	High	No	Low
UV Lamp	N/A	Yes	Yes	Yes	Yes	No	No	No	Some	Small	Active	Low	Yes	Low
Ion Generator	0.1 microns	Yes	Yes	Yes	No	Yes	Yes	No	Some	Small	Active	Low	No	Low
Ozone Generator	N/A	Some	Some	No	Some	Some	Yes	Yes	Some	Medium	Active	Low	Yes	Low
Photocatalysis	0.1 microns	Yes	Yes	Yes	No	Yes	Yes	Yes	Yes	Small	Passive	High	Yes	Low
Wellis Air Purifier	< 0.1 microns	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Some	Large	Active	Low	No	High

KCL & UPC amongst others, are leading institutions that have tested **Wellisair WADU-02** for various functions related to air and surfaces disinfection effectiveness and operating features & safety.

Korea Conformity Laboratories (KCL)
Korea's leading testing & certification organization approved by the government of Korea. **KCL** specializes in testing a wide range of fields including Environment, Medical, Construction, etc.
